SBC GLOBAL POP ACCOUNT SETUP

This is how I completed the Account Setup:

1. At "Account Setup" select "New".
2. Choose a name for the, e.g., "sbcglobal". At "Mail Service" select "US-Yahoo".
3. Hit "Next".
4. Enter your full e-mail address in "Username".
5. Enter the same password you use for your sbcglobal e-mail account into the "Password" field.
6. Hit "Next".
7. Enter your "Email Address" in that field.
8. Enter "pop.sbcglobal.yahoo.com" into "Incoming Mail Server".
9. Enter "smtp.sbcglobal.yahoo.com" into "Outgoing Mail Server".
10. Hit "Next".
11. Hit "Advanced".
12. Enter "110" in "Port Number" field.
13. Hit "Next".
14. Enter "25" in "Port Number" field.
15. Check "Use authentication (ESMTP)".
16. Enter your full e-mail address in "Username".
17. Enter the same password you use for your sbcglobal e-mail account into the "Password" field.
18. Hit "Done".

Changes required continuing using AT&T /SBC outgoing e-mail

1. Open your email client program.
2. Locate the email account settings for your particular client.
3. Change the **POP server** to **pop.att.yahoo.com**.
4. Change the **SMTP server** to **smtp.att.yahoo.com**.
5. Check the option labeled **Use an encrypted connection (SSL)**.
 - Change the **SMTP port** to **465**.
6. Check the option labeled **Use an encrypted connection (SSL)**.
 - Change the **POP3 port** to **995**.
7. Confirm the above settings before clicking **OK**
